

ROYAL GEOLOGICAL SOCIETY OF CORNWALL in 2016

An Velyn Seaureaugh, Seaureaugh Moor, St Stythians, Cornwall TR3 7DL,
UK

Patron: HER MOST GRACIOUS MAJESTY THE QUEEN

Officers and Council of Trustees 2015 - 16

President: J N Plummer BSc
Hon Secretary: R Holmes CC
Hon Treasurer: Ms B A Kernö BEd

Dr L Jenkin BSc, PhD, CC
Mrs J M Markham AIMLS
Dr C Peters BA, MA, PhD, CEd
Dr A Spalding MA, PhD, FRES, FLS, MIEEM

The Royal Geological Society of Cornwall (RGSC) was instituted in 1814 to encourage the study of geology with special reference to the mining interests of the County; to afford opportunities for the instruction in the subject and to preserve geological knowledge in the Society's *Transactions*. Today it continues as a scientific learned society, forming a focus for geological knowledge, covering an expanding range of disciplines, but especially the role of geology in understanding the environment.

Membership is open to all who have an interest in the Society's objectives. Membership forms may be obtained from the Hon Membership Secretary c/o the above address. Members receive regular updates and journals as published, and are invited to attend all meetings and lectures.

Material for publication is welcome at any time, and should be submitted to the Hon Editor c/o the above address. Contributions for the *Transactions* should follow 'Guidelines for authors' on the following page of this issue.

Volume XXIII Part 1 was published in April 2014, the 200th Anniversary of the Society. Copies may be obtained by contacting the Hon Treasurer at the above address. ISSN: 0372-1108

Hon Editor: Dr K M Hardie-Budden MBE, PhD, FLS, FRSA

TRANSACTIONS of the Royal Geological Society of Cornwall
Guidelines for contributors

Material for publication in the *Transactions* is always welcomed, and should be sent to the Hon Editor, RGSC, c/o the address of the Society as listed on the header. Only original articles, not previously published nor submitted for publication elsewhere are acceptable. If published by the RGSC, the copyright is shared between the Society and the author. However, the contents and opinions expressed in the papers are the sole responsibility of the authors, and correspondence ensuing will be forwarded to them for reply.

The aim of the Society is to produce at least one issue annually, though additional issues may be forthcoming if sufficient material is contributed. Our objectives are to publish material of high scientific standard on a wide range of disciplines relating to the geology of the south-west of England, with special focus on the geology of Cornwall and the Isles of Scilly. These may include primary research papers, review articles and short notes of historical, environmental and ecological importance. These will be subject to the normal processes of peer review. There is no set limit on page numbers, and occasional larger contributions may be considered. Contributions to the *Transactions* may be made by members of the Society and non-members, and within the remit of high scientific standard, may be made by amateur as well as professional geologists and workers in related fields from outside as well as within Cornwall and the Isles of Scilly.

Manuscripts must be submitted initially as typewritten copy or on disc in common word-processing programs (i.e. Word) without extensive formatting. Papers in other formats will be returned for re-typing. An abstract of up to 300 words should precede the paper, except in the case of short notes.

Authors are encouraged to use illustrations in support of text. Photographs must be good quality half-tone (ie, black & white) prints with sharp detail and good contrast. Line-drawings should be bold, in black ink on white card or paper. All illustrations should be submitted ideally 2-3 times final print size. **Maximum width of final print size is 140 mm (portrait format) or 185 mm (landscape format).** They should bear on the back author's name and figure number, and should clearly indicate 'top'. All graphics should be referred to as 'figures', and numbered consecutively in order of presentation. Titles/legends for figures should be grouped on a separate sheet by Figure number.

Twenty-five off-prints of each paper are supplied free to authors, who may order additional off-prints at proof stage, which will be charged at cost.

Early contact by authors planning papers is always helpful and welcomed. Authors planning larger papers and review articles should contact the editor at an early stage with proposals.
